Don McKillop
President
CAMcad Technologies, Inc.
125 Excelsior Parkway, Suite 205
Winter Springs, FL 32708

To Whom It May Concern:

My company manufactures custom, patient-specific devices that are used as radiation filters in the treatment of cancer. We are an FDA compliant, ISO 9001:2000 registered company that receives all of our orders via the internet. Our highly automated manufacturing process receives the customer's specifications via email and creates machining code for our Computerized Numerically Controlled milling machine in less than 10 minutes with very little operator intervention.

This entire process was created by Don and his team of specialized manufacturing and computer engineers to our specifications. As a direct result of their creativity and consultations with my company, cancer patients around the world are receiving precisely machined medical devices manufactured to their own unique anatomy in less than 24 hours.

If you have any questions regarding Don or his team members that have assisted us in creating our manufacturing process, please give me a call at 800-255-1613.

Sincerely,

Richard L. Sweat
President
